

IP Audio Controller

The AU-IP-21 has the choice of Optical or analogue stereo inputs, outputting to analogue L/R with the choice of mono or stereo. Telnet and Web GUI control provide remote control over a network. The Web GUI inputs labels can be edited allowing the user to customize the interface. Ideal for adding remote volume control to amplification systems.

FEATURES

- Supports optical input sampling rate up to 192kHz
- Supports Optical & analogue L/R inputs to analogue L/R output
- Support Stereo out or Mono out
- Support Volume control by Telnet or Web GUI
- Single button source selection
- Editable source labels in Web GUI

SPECIFICATIONS
